Dear AB&I Foundry,

Thank you so much for hosting a virtual tour of your workplace with us on August 26, 2020! Having the opportunity to discuss and directly observe a variety of industries is an essential part of our education and we are extremely grateful for your hospitality, time, and your willingness to share your industry knowledge with us.

Your willingness to coordinate, arrange, and present in a virtual format was an impressive and very educational experience. Your tour was well received by the residents and was very appreciated, especially with the difficulty this year has presented in arranging site visits with COVID-19. The visit was truly a testament of your company's ability to adapt and highlights your dedication to outreach and building community relationships.

Hopefully we can work together again in the future.

Stay well,

The UCSF Occupational and Environmental Medicine Residents
